

PROFESSIONAL

"There **is** a better way to protect my data than tape!"

The Next Generation in backup, restore and replication is now available and affordable, InfiniSAN D2D Professional Disk to Disk backup. Through the combination of cost-correct hard disk-based, RAID implemented hardware and a data management application that provides features surpassing the best tape-based solutions, InfiniSAN D2D Pro redefines our industry's approach to back-ups and information management. Compared to tape-based alternatives, InfiniSAN D2D Pro is easier to use, infinitely more reliable and provides superior business continuity. Delivering savings through efficiency, recent advances in technology and the creation of a market leading, correct-cost approach, Nexsan continues the first actual paradigm shift in backup technology with InfiniSAN D2D Professional.

InfiniSAN D2D Professional

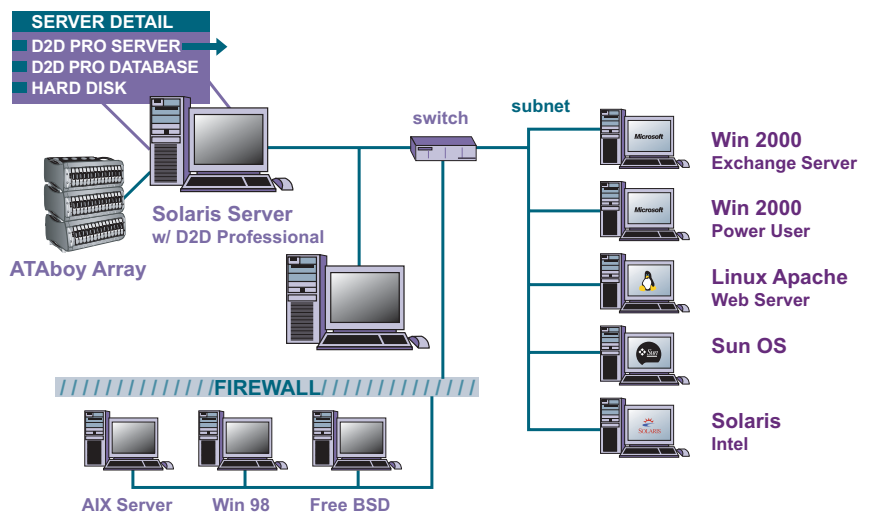

With InfiniSAN D2D Professional, Nexsan extends the award-winning InfiniSAN D2D product line to meet the needs of the enterprise environment. InfiniSAN D2D Pro delivers fast and secure enterprise class backup and disaster recovery. D2D Pro provides high performance backup and recovery for a single system or wide variety of systems across your network. D2D Pro supports the most complex networks to the most simplistic. It supports the following servers: Linux, SCO Unix, SCO OSR5, SCO UnixWare, Solaris Sparc and Intel, Dec Alpha, HP-UX and AIX. An extensive list of clients is also supported. D2D Professional is complimented by a variety of disaster recovery modules for both Intel and RISC-based platforms.

D2D Professional uses a client/server architecture to provide enterprise-wide services via TCP/IP. Master and incremental backups for each client or group of clients can be scheduled as often as desired. D2D Professional's internal database maintains every backup on the disk and every file in that backup.

D2D Professional is easy to install and operate. The D2D solution is proven, feature and operation rich, scalable and available with add on crash recovery products. D2D Professional is available in standalone, server, client and clustered versions.

Disk to Disk - Windowless Backup

InfiniSAN D2D Professional protects critical data through incremental, real time backup to either a local on-site on-line primary and/or an off-site on-line secondary disaster recovery system. This model eliminates backup window problems and the exposure to loss of mission critical data associated with traditional backup applications. Enabling faster backups and on-line restores, D2D Pro provides significantly more features at a lower cost per gigabyte than tape.

Advanced Features

- Easy Installation. Typical installation in under 15 minutes
- The most compact database in the industry (1/20th the space of competitors products) is also self-correcting
- Easy to use Interface. 4 are available: server command-line, server character (telnet), server GUI, Client GUI
- Backs up Windows Registry, Windows open files, RAW partitions, device files, sym links, empty directories and more
- Bit-Level verification ensures complete data integrity
- Comprehensive backup scheduler to run backups unattended (individually or in groups)
- On-line database of all backups, verifies, and restores
- Server and client sided before and after commands
- Allows simultaneous connections to PCs
- Remote administration via dialup modem or telnet
- Built-in network troubleshooter
- Hive, tree, branch or key level registry backup and restore
- Hot DLL restore (restores DLLs even while they are running)
- Integrated crash recovery available (requires additional purchase of Nexsan crash recovery module)
- Fast file seek for extremely quick restores
- Datasweep™ technology picks up critical files in a given directory automatically any time a file changes. Beneficial for today's large calendar, and email folders
- Reporting and Diagnostics
- Wide variety of reporting capabilities. You can send and receive reports via email, printer, PDA or cell phone. Bit-level verification report showing number of files verified, number not checked, number with problems and full status information.
- Client version number is in all reports so you can easily see if your client software needs updating with a new release
- Diagnostics messages sorted into warnings and errors for quick scanning and easier comprehension
- Diagnostics and error messages recorded in database are available with a single mouse click
- Client sided graphical user interface
- Large file support (over 2 gigabyte files)
- Only one system daemon (uses less system resources)

Technical Specifications

Server Operating Systems Supported:

- SCO Unix
- SCO OSR5
- SCO UnixWare
- Solaris Sparc and Intel
- Dec Alpha
- HP-UX
- AIX

Client Connection Supported:

- Linux Intel and Alpha
- SCO Unix
- SCO OSR5
- Solaris Sparc and Intel
- SCO UnixWare
- SGI Irix
- Sun OS
- BSDI
- Free BSD
- Open BSD
- AIX
- Dec Alpha
- DG-UX
- HP-UX
- Windows
(3-1/95/98/ME/NT/2000/XP)
- Novell and Citrix

For Managers and Administrators

D2D Professional simplifies the backup process. There is no longer the need to decide what type of clients you need to buy or what type of server platform makes sense. With Nexsan's TCO guarantee you can be assured that you are receiving complete data protection at a price you can afford, enabling you to stretch your planned disaster recovery budget. D2D Pro allows you to recover your whole office from wherever you may be via four interfaces (server command-line, server character (telnet), server GUI, Client GUI) with which to access the application and to begin restoration. Reporting is detailed and enables the user to quickly locate any problems. D2D Professional supports an extensive range of operating systems and databases.

Three Year Total Cost of Ownership Guarantee

Nexsan's total coverage warranty provides the final component to the D2D Professional three-year total cost of ownership guarantee. D2D Professional eliminates tape replacement costs. No tape media age tracking. No bar code labels to order. No bar code number sequence's to monitor. Increased storage capacity without additional application-based tape library slots or licensing charges. D2D Professional delivers superior ROI and a total cost of ownership that is far less than tape-based solutions.
